

SEE WHAT MATTERS...

The Revolutionary **Sportiiiis™**

Sportiiiis POV

A heads-up display system for Athletes that allows you to **see what matters.**

Sportiiiis. See what matters

Meet Sportiiiis, a visual revolution in training and racing technology. Sportiiiis is a Heads Up Display and audio system that gives you, the athlete, feedback on critical performance data. This enables you to maintain form, keep your eyes on the road and always be safe.

Sportiiiis attaches to virtually any pair of glasses and guides you to your target zone with multi-colored LEDs positioned in your peripheral vision. A simple tap of the unit gives you a verbal update on your current performance. Sportiiiis is compatible with ANT+ enabled devices for easy integration with your current training tools!

Powerful Software

Intuitive Mac, PC and Smartphone software allows you to quickly and easily program the Sportiiiis unit with your desired heart rate, power, speed, cadence and pace zones.

Sportiiiis Features

- Multi-colored LED boom provides instant visual feedback of critical workout and racing data (Heart Rate, Cadence, Power, Speed, Pace, and other ANT+ compatible data)
- Adjustable boom easily attaches to virtually any pair of glasses
- Built-in speaker provides spoken audio prompts with detailed levels of performance
- TipTap™ technology allows changing between display settings and receiving detailed zone information by simply tapping on the unit
- Compatible with Training Peaks and other leading software to upload and analyze workout and race data

Starting at \$199
